

PhD Programs in Biomedical Sciences & in Biosciences

Wednesday Seminar Series

at 16:30 in Aula Magna - A. Vallisneri building

February 3

Ron Kopito, Stanford University
Comparative Genomics of Mammalian Protein Quality Control

March 15

Alain Lescure, French National Centre for Scientific Research
Selenium Importance for Muscle Physiology

April 19

Fabrizio d'Adda di Fagagna, IFOM-IEO
DNA Damage Response in Aging and Cancer
and the Role of Noncoding RNAs

May 3

Catherine-Laure Tomasetto, University of Strasbourg
The Lipid Transfer Protein STARD3 Modulates Intracellular
Cholesterol Localization and Sustains Breast Cancer Cell Growth

May 17

David Rubinsztein, Cambridge Institute for Medical Research
Autophagy and Neurodegeneration

June 5

Xinnan Wang, Stanford University
Is There a Common Theme in Parkinson's — the role of mitochondria?

June 21

David M. Sabatini, MIT/Whitehead Institute
mTOR and Lysosomal Signaling

September 6

Marcia Haigis, Harvard Medical School
Mitochondrial Sirtuins in Mammalian Aging and Disease

September 19

Stirling Churchman, Harvard Medical School
Regulation of Mitochondrial Gene Expression

October 4

Enrico Martinoia, University of Zürich
The Role of ABC Proteins in Plant Hormone Transport

October 25

Pekka Katajisto, University of Helsinki/Karolinska Institute
Asymmetric Apportioning of Damaged Cellular Components

November 15

Maria Mota, Institute of Molecular Medicine Lisbon
Nutrient Sensing by Parasites

November 22

Nick Davies, University of Cambridge
Cuckoos versus Hosts - an Evolutionary Arms Race

November 29

Andreas Weber, University of Düsseldorf
Feeding 10 Billion People - Future Proving Plants
to increase Productivity and Efficiency

UNIVERSITÀ
DEGLI STUDI
DI PADOVA

Phd Program in Biomedical Sciences
Coordinator Paolo Bernardi

PhD Program in Biosciences
Coordinator Ildikò Szabò
